

# What is storymode?

Storymode is an enhanced Mad Libs that can create different scenarios based on players input.

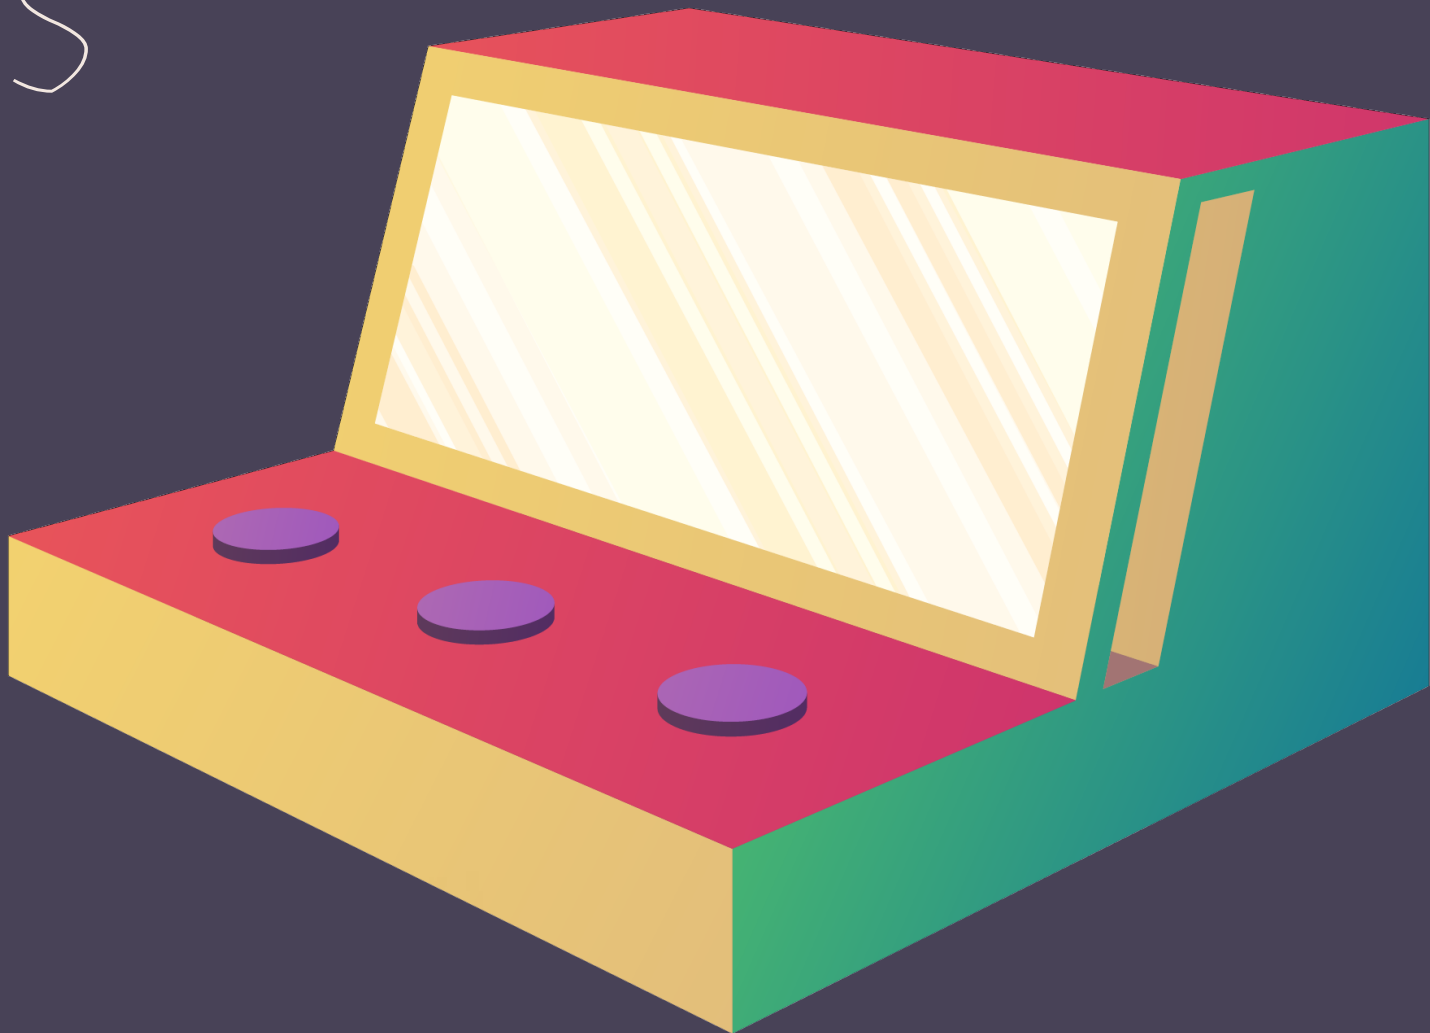

# How does it work?

Buttons are used to gather the user's choices are connected to certain options displayed on the screen (e.g. red button connects to option 1). When prompted user will push a button which will 1) add option to the filter and 2) send a signal to the computer to move on to the next screen.

# What are the restrictions?

Storymode will require WiFi or some kind of Internet to connect and a way to power the raspberry pi on the go.

# Sketches

# Sample filter
